Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Sincerely,

Michael santori

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

I hope someone is thinking about security on this issue. If a hostile nation or terrorist group could take down our defense use of GPS, and have been granted that ability by none other than our government, who do we hold responsible?

That thought (above) dwarfs the possibility of losing lives at sea due to GPS disruptions. Still it would seem very foolish to allow anyone the opportunity to even accidentally disrupt this important navigating system.
Please do not allow ANYONE to use this bandwidth.

Sincerely,

Michael Luchak

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

I personally used GPS to assist safely and successfully delivering our family of four, on a 40 foot sailboat in 2008/2009 for a trip from Everett, Washington all the way down the US coast. We completed our voyage in the Sea of Cortez, Mexico and relied on GPS the entire way.

While GPS was most certainly not the sole means for safe navigation, it was a key component for cross-reference and gave this captain additional peace of mind for my family/crew's safety.

Sincerely,

Robert J Todd

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

While boating and fishing in the Galveston Texas area we sometimes encounter unexpected sea fog. The GPS is my only means to safely navigate to my home port. I also must have GPS in order to navigate at night when there is no moonlight.

Sincerely,

Kenneth Scott
